"Outside the Law"

Starring Priscilla Dean and Lon Chaney

She was soft as silk—He was smooth as Satin. He hated her because she spurned him—she vowed vengeance because he "framed" her father. A marvellous dramatic thriller of professional jealousy amongst professional crooks and honor amongst thieves. With a powerful, surprise climax that leaves you limp with excitement.

"Where Was I?"

Champion Celebrates Diamond Jubilee

Exceptionally heavy rains, lasting until late in the evening of June 30th, caused the cancellation of many of the major events on the programme for July 1st. When the big day opened with sunshine and people from all quarters began to arrive in town in hundreds, despite the almost impassable roads, an effort was made to entertain the crowd as far as was possible under the circumstances. The parade advertised for ten o'clock was put on about two o'clock in the afternoon with a programme at the grounds, this being followed by a baseball game between Champion and Carmanagay. In the evening the regular programme of fireworks and dances was followed, and although a heavy downpour of rain early in the evening forced everyone to shelter for a time, the crowd seemed to enjoy everything offered for their entertainment.

Shortly after one o'clock the parade was formed in the subdivision and headed by the town officials took in the main streets, despite the mud and other drawbacks. The panatrophe, mounted upon a truck headed the float, followed by the Canada float, Miss Thelma Williamson occupying the throne as Miss Canada. Washington school and the Women's Institute also had handsome floats, while the school children, representing the different provinces of the Dominion were in trucks and on foot. At the grounds the programme included, besides the patriotic recitations noted elsewhere, the singing of "O Canada," "Land of Our Birth" and "The Maple Leaf," a Pageant by the high school students and the singing of "O Canada" in French by the Misses Van Belsen.

Carmanagay and Champion played a game of baseball in which the local team took the small end of a big score, although the game was a fair one from a spectator's point of view, and considerable interest also developed in the athletic events.

The crowd also enjoyed some impromptu bucking events. About six o'clock rain drove everyone to shelter and every place in town was crowded. The picture show opened at 6:30 and this, with the dance later in the evening relieved the congestion. The fireworks at dusk were excellent and received approval from everyone, being much better than is usually the case.

Following are the prize winners.

Best Boys Costume—Joe McNaughton.
Best Girls Costume—Ethel McDougall.
Best Comic Costume—Marion Girdler.
Best Cowboy Costume—Lora Peterson.
Special—George Smith.
Boy on Bicycle—Don Stephenson.
Boy on Bicycle—James Brown.

Boys Race—Odel Peterson, R. Horverson, James Brown.

Girls Race—Eva Latiff, F. Fisher, N. Dalsin.

Boys Race—Mac Hoskins, R. Latiff, H. Klen.

Girls Race—Mac Fisher, Marie Matlock, C. Stone.

Boys Race—N. Scott, A. Frame, G. McNamee.

Girls Race—R. Fath, Helen Collins, Ellen Lawrence.

Boys Race—Leslie Nicholls, Bruce McKay, Nevill Scott.

Girls Race—A. Williamson, Phyllis Boden, Helen Hoskins.

Boys Race—H. Hafford, B. Leback, N. Scott.

Local Grain Man Receives Recognition

R. F. Nelson will go on the road for the National Elevator Co. this fall, with headquarters at Edmonton, where he will move in the near future. In consequence he is offering his household effects for sale. See advert. elsewhere in this issue.

The Wheat Pool Purchases Residence

The Wheat Pool has purchased J. M. Moffatt's residence for occupation by the manager of their elevator here. Fred Watts, who will be the man in question is at present ill with pneumonia at Namaka. Mr. Moffatt will immediately proceed with the erection of a handsome new residence on the best site in town, where he already has a well.

Wisconsin Visitors Brave Muddy Roads

Mr. and Mrs. Mills, of Lacrosse, Wis., are on a visit to the latter's brother, L. M. Groves, and two sisters, Mrs. Frank Smith and Mrs. Fred Wise. They are making the trip by motor car. On the way here they took the train from Lethbridge owing to the bad roads, Messrs. Mills and Groves going for the car on Monday.

O. E. S. Picnic Arranged for July 20

The O.E.S. picnic will be held on John Archibald's lawn on Wednesday afternoon, July 20th. All members of the O.E.S. and Masonic fraternity are invited to attend. Anyone not having a way of conveyance please notify the committee, Mrs. G. A. Orr, Mrs. J. S. Collins or Mrs. Woodhull.

Aaron Spiro is now touring Saskatchewan advocating the securing of legislation making the sale of wheat through the pool compulsory as soon as a considerable majority of the acreage is signed up. The compulsory pool idea was thoroughly exploded once, but perhaps there is nothing like trying again.

Richard Depue has developed artistic talent of a special order at very tender years. The fact that he used the tenders of a new Hupp car for canvases and painted a different colored landscape on each did not appeal to the less cultured taste of the owner of the car or his father, who proceeded to erase the beautiful work with gasoline.

Mrs. W. E. Warren and daughter of Seattle have been visiting her mother, Mrs. T. Gill in Victoria the past week. Mr. W. E. Warren and son spent the week end with them. Mrs. T. Gill is returning with her daughter to Seattle to spend the next few weeks over there.

Preparations for the starting of a restaurant in the building recently vacated by Gunder Nerison are now under way and the restaurant will be open for business in a few days.

Mr. and Mrs. A. Ruggles, of the Gunter Ranch, celebrated the 25th anniversary of their wedding on Saturday, July 2nd. The guests were members of their own family and relatives.

Miss Fern Bond is spending her holidays at Portland, Oregon.

THURSDAY, JULY 7, 1927

NOTES AND COMMENT.

It is a matter for general regret that the wet weather and the condition of the roads necessitated the cancellation of the major portion of the programme advertised for July 1st. It is doubtful if any more could have been done by the committees and the citizens generally to insure a big day for the Diamond Jubilee celebration and the unfortunate weather (for celebrations only) was naturally regretted by those who had gone to such pains to prepare a suitable programme for such an auspicious occasion. The results achieved by putting on the curtailed programme under unusual difficulties were decidedly satisfactory, and the size of the crowd present was a fair indication of the multitude that would have been here had the roads permitted.

From all parts of the province except a small area on the Milk River, come reports of plentiful moisture and splendid crop prospects. In this vicinity at isolated points slight damage by hail has been reported, but the area affected was small and the damage not of a character to destroy the crop. The outlook could not be more favorable in any way.

And now the holiday season is here, and by all appearances it will be more largely than for many years past. The Calgary exhibition, beginning on Monday will be largely patronized, and vacation plans are general and include visits to watering places in every direction. Prospects are so good in the way of crops that there is a general feeling of optimism which will lead to more holidays than usual.

Rain has been so common and constant here for the past eight days that the only weather worth reporting would be the intermittent bits of sunshine, which were usually of short duration.

NEWS NOTES

Raising reindeer for commercial purposes in Canada will be undertaken this year by the Dominion Reindeer Company, with headquarters at Vancouver, which has imported some 5,000 head of reindeer from Alaska. This herd will be located on the vast grazing areas between the Athabasca Great Slave Lakes where the company has secured over three million acres for this purpose.

Alberta's total fur production for 1925-26 was valued at \$2,122,775, according to official figures compiled by the Dominion Bureau of Statistics and just received by the Provincial Game Branch. This represents a gain of \$90,000 over the preceding year, and puts Alberta in third place among the provinces in the value of furs produced.

Representatives of the Soviet Government have been in the province during the past week

arranging for the selection of the horses which are to go from Alberta as part of the 4,000 head being purchased in Western Canada. This is the largest single deal of its kind since before the war. The first shipment of some 1,400 head is expected to go forward from Quebec about July 15, on a Russian boat sent over specially for this purpose.

Brown trout fry to the number of 185,000 have been placed during the past week in the North and South Raven Rivers and Prairie, Alford and Muskeg Creeks which are tributaries of the Red Deer and Saskatchewan Rivers, west of Red Deer. The distribution was handled by Fisheries Inspector Martin of Banff.

TO
Give You Service

The U.G.G. Elevator at your station is there to give you service, both in handling your grain and in furnishing farm supplies.

These farmer-owned elevators mean better returns for you in price and grade. The U.G.G. elevators set a standard which other companies have to meet.

U.G.G. elevators are there for the use and benefit of all farmers alike. Shareholders in the Company and farmers who are not shareholders all get the same service and treatment.

We don't claim to be perfect, but we do claim—and we believe justly—that the service given by U.G.G. elevators and by all departments of the business brings real financial benefit to farmers.

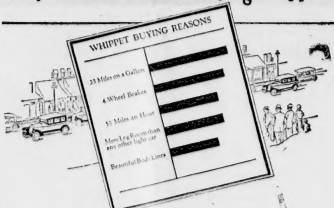

If you agree that this is a fair claim, we shall appreciate your business at your nearest U.G.G. Elevator.

Champion, - Alberta

All Canada Celebrated
July 1st

But what a Celebration would take place if you placed a Coleman Gas Range in your home.

There is one other spot we know of that is hotter than a Coal Range in Summer.

A Coleman Gas Range is safe to operate.

It works under air pressure as does your lamp.

It is easy on fuel consumption.

It gives a quick, intense heat.

It does not blacken your pots and pans.

It is out the moment your meal is cooked.

It can be used for every purpose.

It is strong and durable.

It does not throw off any odors as many other stoves do.

The repairs are few, if any, and not expensive.

A Coleman Stove in your home will fill a real need and save your wife endless hours of work in the stifling heat of a Coal Range.

We have a Coleman Range in stock.
Look it over and satisfy yourself that
it is what we claim.

Irish Free State Making Progress As A Member Of The British Commonwealth

The only tangible bond linking together the members of the British Commonwealth of Nations is the Imperial Conference of last November. It is the British crown, or the person of the King, but the interests, important among them, her economic status, which bind her to Britain and the commonwealth. Timothy A. Smiddy, minister of the Irish Free State to the United States, said in a public address at the University of Chicago, Mr. Smiddy delivered one of the Norman Walsh Harris lectures on the normal subject of the British Empire.

"We have co-operation and no coercion, and the bonds which bind the various nations are intangible," the Irish minister said. "Whether these symbols signifying membership in an association of free nations are bonds which attach or bonds which chafe, is to be determined by the future. Since the establishment of the Anglo-Irish treaty we have been free to work out our national life in our own way without help or hindrance from any outside source whatever."

"Nature has placed Ireland and Great Britain in close proximity, and each other, which geographical continuity begets for Ireland a relationship to Great Britain more intimate than that of any other member of the commonwealth. This relationship is exemplified economically by the narrow Irish Free State, which exports an average, 95 per cent. of the exports of the Irish Free State are consigned to Great Britain and Northern Ireland, and 85 per cent. of the imports of the Irish Free State are from Great Britain."

Speaker of the progress that has been made by the Irish Free State as an autonomous member of the Empire, Mr. Smiddy said: "If one of the tests of self-government is economic stability, and to lay the foundations for an economic and cultural development that will create for the average citizen the opportunity for a full life, the people of the Irish Free State have already during the past five years amply justified their claim to be allowed to govern themselves."

Stubble Burning

Found to Be An Expensive Operation Under Best of Conditions

Burning of stubble has been found to be of some value in the destruction of weeds by destroying the seed plants with their seed heads, but they have entered the soil. Burning stubble is, however, an expensive operation even when the latest type of oil burner is used. Tests at the Swift Current Experimental Station showed that a running fire started with an oil burner and carried on until the stubble was reduced to a fine ash, obtained making the acre cost of burning very low, but a fire of this kind can be obtained only in heavy stubble, which usually consists of weeds. Weedy stubble, it is observed, is almost always short and this will not carry a continuous fire, which is necessary if the weeds are to be destroyed.

The 1926 report of the Swift Current Experimental Station, which can be obtained from the Publications Branch of the Department of Agriculture, Ottawa, gives illustrations of stubble burning at work. The machine is drawn behind a rack from which straw is fed into a wire firebox. The firebox is made of sheet iron and is equipped with parallel grate-bars which slide over the stubble. A small gas engine is belted to a fan supplying a draft of air which blows the fire into the stubble. A 14-foot machine of this kind will burn from 2 to 3 acres an hour. Three men and four horses are required to keep it running. From 40 to 60 cents per acre was found to be the cost of the labor and man and horse, while the machine cost 3 cents an acre.

Further trials of this machine are to be made before the Station is prepared to make any recommendations with respect to its efficiency.

A Scotsman paid his tax fare and gave the driver a penny for a tip.

"What's this?" growled the driver, peeling the penny and glaring at it in disgust.

"Ye're a sportsman," said the Scotsman, beaming at him. "Talis!"

That prospectus picture to X-ray may be contained in the light emitted by glowworms, is the opinion of some scientists.

Purkin—"Your wife decided to leave to drive, too."

Spark—"Yes, she won't stop at anything."

Rapid-Growing Tree Has Been Developed

The voluminous daily newspaper condemned to die for the slaughter of wood-pulp forests, has been regenerated by the development of a tree that will grow to a height of 60 feet and a thickness of 18 inches in 12 years, says the New York Evening Post.

This tree, a hybrid poplar, has been developed by Dr. Ralph McKee of Columbia University and Dr. A. B. Stout of New York. The work was backed by the Oxford Paper Company of Ramford, Maine. The hybridization was carried out at Highland Park, Rochester, N.Y., and the Agricultural Experiment Station at Geneva, N.Y.

The world is now consuming wood pulp four times as fast as it grows in forests. The new tree, however, will remove wood pulp production from the category of forestry to that of agriculture, and permit the growing of trees to regular crops as rapidly as they are needed. The first crop, it is promised, may be harvested within ten years, to this out rapidly growing forests.

The paper obtained from poplar pulpwood, said Dr. McKee, is superior to that now generally obtained from spruce. The new trees can be propagated from seedlings.

Horses Return to Birthplace

Teams Passed Two Late Winter Months in the Snow

A year after P. H. Ashby, an Edmonton Alberta farmer, bought a pair of horses, he missed his team one morning. The horses were found on a farm fifty miles away. His owner said they had strayed there but he said at home on the place.

Later it was learned the horses had been sold on the farm to which they had strayed and twice had been sold before Ashby got them. They had passed up these two previous homes. Their route back to their place of birth was through woods and open country but they had never seen before. Animals have a sixth sense.

Winnipeg Newspaper Union

The Winnipeg newspaper union, which has been in existence for some time, has been found to be of some value in the destruction of weeds by destroying the seed plants with their seed heads, but they have entered the soil.

Burning stubble is, however, an expensive operation even when the latest type of oil burner is used. Tests at the Swift Current Experimental Station showed that a running fire started with an oil burner and carried on until the stubble was reduced to a fine ash, obtained making the acre cost of burning very low, but a fire of this kind can be obtained only in heavy stubble, which usually consists of weeds. Weedy stubble, it is observed, is almost always short and this will not carry a continuous fire, which is necessary if the weeds are to be destroyed.

The 1926 report of the Swift Current Experimental Station, which can be obtained from the Publications Branch of the Department of Agriculture, Ottawa, gives illustrations of stubble burning at work. The machine is drawn behind a rack from which straw is fed into a wire firebox. The firebox is made of sheet iron and is equipped with parallel grate-bars which slide over the stubble. A small gas engine is belted to a fan supplying a draft of air which blows the fire into the stubble. A 14-foot machine of this kind will burn from 2 to 3 acres an hour. Three men and four horses are required to keep it running. From 40 to 60 cents per acre was found to be the cost of the labor and man and horse, while the machine cost 3 cents an acre.

Further trials of this machine are to be made before the Station is prepared to make any recommendations with respect to its efficiency.

"What's this?" growled the driver, peeling the penny and glaring at it in disgust.

"Ye're a sportsman," said the Scotsman, beaming at him. "Talis!"

That prospectus picture to X-ray may be contained in the light emitted by glowworms, is the opinion of some scientists.

Purkin—"Your wife decided to leave to drive, too."

Spark—"Yes, she won't stop at anything."

Stimulus of Nitrate Counteracts Drought

Top Dressing of Fertilizers Keeps Up Pasture in Mid-Summer

Topdressing of pastures and meadows as a stimulus to growth during the summer months, is a practice followed by farmers in Britain and Europe that might find a wider application in Canada than it does at the present time. Midsummer droughts of considerable duration are not all uncommon, and it should be worth while to provide the extra stimulus in the form of fertilizer, to counteract this. For topdressing a quick-acting fertilizer is essential and applications of nitrate of soda, at the rate of from 100 to 150 pounds per acre, given in two or three applications, have carried out on pasture plots at the Fredericton, N.B., Experimental Station. In 1926, the plots that received 200 pounds of nitrate per acre averaged 4,953 pounds of clipped grass a per acre basis; the plots that received 100 pounds of nitrate yielded 4,599 pounds of grass, and the unfertilized pasture plot yielded only 3,267 pounds. This was an increase of 1,746 pounds in the one case, and 1,332 pounds in the other. It was noted that in the fertilized plots the grass was thick and of a dark green color, and that weeds were not plentiful. The unfertilized plots, on the other hand, conditions were just the reverse.

Applications of nitrate in the early summer—applied probably just before a rain—should be effective in giving well-watered pastures a new lease of life that should carry them over the droughty midsummer period.

Has Won Many Prizes

Large Pig in World Weighs Over Half a Ton

Billy, the world's largest pig, is on view at an agricultural show in Johannesburg, and is insured for \$25,000. He is 8 ft. 3 inches long, 6 ft. 5 inches in girth, and weighs just over half a ton.

Billy has travelled 35,000 miles and is just back from a visit to Australia. He has a voracious appetite, and every day consumes four cases of apples or nine buckets of milk, two bushels of corn, 16 or 18 cabbages and a few "odds and ends."

Billy, who has been prize innumerable, has a valet specially appointed to groom him, to feed him, to clean his modulation in train and body. When he travels, his food alone costs \$10 a day.

Billy's owner has decided to send him to the British Museum after his death.

The mammoth pig is only 23 months old, and a long and prosperous career still lies before him.

An egg shell may be thin, but it is so fragile. An egg placed beneath the giant treading machine at the Bureau of Standards, Washington, without a pressure of 51 pounds before it was crushed. Two hundred tons was required to demolish a foot-square piece of tin.

Detective—"Ah, we have a new code."

Wife—"How could you tell?"

Detective—"I observed strange fingerprints on the pillow."

All snake venom is not alike. Some cause paralysis of the diaphragm.

Mr. Hensley—"Today is your birthday, and I have a surprise for you. Can you guess what it is?"

Mrs. Hensley—"I'm already surprised. That is the first time in ten years that you remembered it."

"Dust," from a blast furnace at an automobile manufacturing plant has been found to contain fifty per cent. from one, which is being reclaimed.

New Cook: I can't get the dinner the way you told me to, ma'am.

Mistress: Why not?

New Cook: Didn't you tell me to have roast beef and gravy?

Mistress: Yes, that's what I ordered.

New Cook: Well, the butcher sent up the best beef he didn't send a drop of gravy.

Mr. Hensley—"Today is your birthday, and I have a surprise for you. Can you guess what it is?"

Mrs. Hensley—"I'm already surprised. That is the first time in ten years that you remembered it."

Saskatchewan Livestock Sales

Cattle Breeders' Association Held Successful Sales at Prince Albert and Saskatoon

The Saskatchewan Cattle Breeders' association sales which were held at Prince Albert on June 7 and 8, respectively, proved to be quite successful. In all thirty-five head of pure bred stock were sold. The quality of the stock offered was good with the exception of a few individuals that did not sell. There was possibly too high a percentage of junior yearling bulls to obtain a very high average. The Prince Albert sale, which was held on June 7, had an average of \$112.50. In the Shorthorn classes the junior yearling and grand champion Shorthorn bull, which was contributed by the Saskatchewan Institute of Animal Husbandry, sold to J. T. Combs, Pleasant Valley, for \$170. The senior champion bull was contributed by H. J. Hurlburt and sold to G. W. Griskey, of Tisdale.

In the Aberdeen Angus classes the junior and grand champion bull was contributed by Wm. D. Lyon, of Devon, and was purchased by J. D. Robertson, of the department of agriculture, Regina.

The senior champion Hereford was bred by T. A. Clark, of Lake Valley, and was a real good individual. The Saskatoon sale proved to be more successful than the Prince Albert sale. In that the general average was \$125.65.

The sale was handled by J. W. Burns, of Calgary, and the judges were John Brandt, of Edmonton, and W. D. Lyon, of Devon. The prices of the Saskatchewan bulls changed hands at an average price of \$137. The junior and grand champion was contributed by the University of Saskatchewan, Saskatoon, and sold to John Gordon, Richmond, for \$215. The top price of the sale was received for the first prize senior yearling Shorthorn bull and was sold to the department of Indian Affairs for \$245.

The grand champion Aberdeen Angus bull was contributed by C. B. Wade, of Assiniboia, and was purchased by the livestock branch, Regina, while the grand champion Hereford bull was purchased by the department of Indian Affairs, Regina.

In the Holstein classes the junior champion was sold to Mr. Strathmore, Sir Donald Fairchild, contributed by John H. Clark, of Neillville, was awarded the grand championship, and was sold to F. Walters, of Moose Jaw, for \$150.

The heaviest buyers at these sales was the livestock branch of the department of agriculture, and Mr. Christianson, of the department of Indian Affairs, Regina.

Hard on the Cook

New Cook: I can't get the dinner the way you told me to, ma'am.

Mistress: Why not?

New Cook: Didn't you tell me to have roast beef and gravy?

Mistress: Yes, that's what I ordered.

New Cook: Well, the butcher sent up the best beef he didn't send a drop of gravy.

Mr. Hensley—"Today is your birthday, and I have a surprise for you. Can you guess what it is?"

Mrs. Hensley—"I'm already surprised. That is the first time in ten years that you remembered it."

"Dust," from a blast furnace at an automobile manufacturing plant has been found to contain fifty per cent. from one, which is being reclaimed.

New Cook: I can't get the dinner the way you told me to, ma'am.

Mistress: Why not?

New Cook: Didn't you tell me to have roast beef and gravy?

Mistress: Yes, that's what I ordered.

New Cook: Well, the butcher sent up the best beef he didn't send a drop of gravy.

Mr. Hensley—"Today is your birthday, and I have a surprise for you. Can you guess what it is?"

Mrs. Hensley—"I'm already surprised. That is the first time in ten years that you remembered it."

National Research Laboratories Will Assist In Applying Science To Industry In Canada

Canada Leading In Export of Wheat

Will Be Greater This Year Opinion of French Expert

Louis Louis Dreyfus, a French banker and grain merchant, who is one of the leading authorities on wheat, recently gave an address to the French-American committee in Paris in which he declared that Canada was the greatest wheat-exporting country in the world, that the grain from the Dominion had no equal in quality except some of the Russian cereal, and that supplies available from Canada would continue to increase.

With established agencies in all wheat-producing countries in the world, including an agency at Vancouver, which he personally visited last year, Mr. Dreyfus predicted that the exports of wheat from the United States, Canada and Argentina would increase to 14,000,000 tons in 1927, against 14,000,000 tons in 1926. Of this total he put the shipments from the United States at 6,000,000 tons, those from Canada at 6,000,000, and those from Argentina at 4,000,000. He termed these super-producing countries as the "wheat triad," and predicted that they would continue to produce more and more wheat.

He expressed the belief that France eventually would produce enough wheat to supply the demands of its people, but some time hence.

Cost of Operating a "Combine"

Combined Reaper and Thrasher Effects Considerable Saving

In a normal season the combined reaper-thresher will cut and thresh wheat, oats, barley, fall rye and flax at a considerable saving over the binder and separator. Investigations have been made on this point at the Swift Current Experimental Station, and the results are detailed in a Dominion Department of Agriculture pamphlet entitled "The Combined Reaper-Thresher in Western Canada."

It was found that a sixteen-foot combine drawn by 12 horses will cut about 35 acres in a 10 hour day. Drawn by a tractor it cuts about 41 acres in the same time.

In the case of such a combine drawn by 12 horses and operating 26 days the cost per acre was \$13.00, 9 cents a bushel on a 20 bushel per acre crop. In similar circumstances the cost of a tractor drawn combine was \$14.64 per acre and 8 cents per bushel. Compared with this harvesting with binder and separator cost 12 cents per bushel.

Community Notes

Moore Jaw and Leitchbridge have embarked on what is called a "community hotel" project, the idea being to raise by stock subscriptions from citizens funds sufficient to build and equip good, thoroughly up-to-date hotels in these cities. The company which looks after the selling of most first shares held that there is room for such hotel or hotels.

So many shillings are put into London gas meters that a coin slot here often exists until meters can be changed and the coins put into circulation again.

Michigan Supplies More Settlers for Western Canada Than Any

The state of Michigan is apparently supplying more settlers for Western Canada than any other state in the United States, according to figures submitted by Fred W. Kerr, Dominion immigration agent at Detroit, who has been in the west gathering first hand information of agricultural conditions here.

Many farmers have come from that state this year, he says. Last year, according to returns made public by U.S. authorities, Michigan sent 2,661 of the total of 21,025 farmers who left the states to make up land in Canada.

Develop Gold Claims

Thirty Placer Gold Claims to Be Developed in Saskatchewan

Development of 20 placer gold claims in the Waterloo Lake district of Saskatchewan is proposed by Edward Tisdale, Canadian born prospector, and H. G. Tucker, both of Chicago, now en route to the northern hinterland. Hon. T. C. Duxley, Saskatchewan Minister of Mines and Industries, arranged for Walter Haines, Provincial Geologist, and Professor Worcester, of the University of Saskatchewan, to join the expedition. Dr. Cameron, Edmonton geologist, will also join the party.

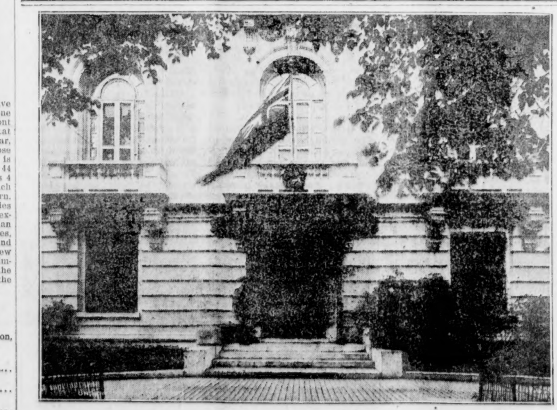

Minister: I hear, Paddy, they've gone dry in the village where your brother lives.

Paddy: Dry, now? They're parched. I just had a letter from Mike and the postman was stuck on with a pin.

Dave—"What is the term applied to one who signs another person's name to a cheque?"

Tom—"Oh, ten to twenty years."

A writer suggests that most half-headed men have found nature's only brave preserve the hair.

AVIATORS LAND IN HAWAII AFTER AN EPIC FLIGHT

Wheeler Field, Island of Oahu, Hawaii.—First to make the 2,400 mile flight between San Francisco and Honolulu, the army fliers, Lieutenants Lester J. Matfield and Albert Hegenberger, arrived here after finishing their long flight in 25 hours and 53 minutes.

Throughout the trans-Pacific trip they had been reported seen only once, by the bomber streamer, when 750 miles from the California coast.

The army fliers came in through clouds this morning, and after the rain and gloom of the night that shrouded their landing place, thousands who had waited through the long night had begun to disperse when Matfield and Hegenberger came through the haze to triumphant landing.

In their flight of approximately 2,400 miles, Matfield and Hegenberger completed the longest trans-oceanic airplane flight ever accomplished. The landing was made on a rain soaked field. The huge plane taxed the entire length of the field. Then circling, it came back to the front of the review stand where the highest army, navy and civil authorities in the island were waiting to extend congratulations to the fliers.

The crowd, assembled by hundreds, hurriedly returning to the field, went wild with joy and enthusiasm. Gales of applause thundered in salute as the plane stopped before the review stand.

Major-General Edward M. Lewis, commander of the Hawaiian department of the army, clasped hands with Matfield and Hegenberger, the eyes of both aviators filled with tears, as he said:

"My boys, I congratulate you." Matfield said that the radio beacon on the island of Maui failed to function.

"Our compass," he said, "is what got us here. If we had not had that we would have been out of luck."

"I am asked," he said, "whether I am tired and hungry but I have answered that a child could swallow me and I would not know it."

"We had some coffee and sandwiches, but we could not find them while travelling," said Matfield.

Hegenberger said: "They, we too, had no mail weather on the trip. In fact we had our troubles but we had great satisfaction in having made the dash."

Believes Strike Is Imminent

C.N.R. Employees Vote in Favor of Action Says Magazine

Montreal.—Despite the offer of the Canadian National Railway giving increases to some 10,000 employees, a strike of these workers is imminent, stated J. E. Macgill, general chairman of the Canadian Brotherhood of Railway Employees here. Results received to date from the strike vote taken recently were overwhelmingly in favor of a strike, it was said at union headquarters.

Hungary's Wheat Crop Less

Ottawa.—According to a cablegram received from the International Institute of Agriculture at Rome, the wheat crop of Hungary is 625,000 bushels compared with 620,000 last year and 716,000 in 1925. The cablegram also states that Hungary's crop of corn is 2,551,000 bushels against 2,615,000 in 1925, and 2,225,000 in 1925.

Authorized to Fire Balloons

Ottawa.—Edmonton has been added to the list of stations at which anti-air balloons are fired on certain authorized occasions, including Royal entries on the anniversary of the birth of the Prince of Wales, and Dominion Day, according to an announcement by the department of National Defence.

Might Impair League's Mission

Geneva, Switzerland.—Great Britain has dropped her proposal for an investigation of the proper role of League of Nations' activities, seeing that she feared the league would be harmed by indiscriminate acceptance of new tasks, which would obscure its high mission to maintain peace.

Canada's Trade Increase

Montreal.—Canada trade with all nations in increased trade since 1913, according to statistics compiled by the National Foreign Trade Council of New York. The figures show that Canada's increase was 35 per cent, Australia export next with 45 per cent, and the United States third with 71 per cent.

Crops Doing Well

Favorable Crop Report Covering All Western Areas

Winnipeg.—Since the completion of seeding operations, crop conditions have been entirely favorable for growth, and crops are doing well almost everywhere, according to the weekly report issued by the Agricultural Department of the Canadian Pacific Railway. Earlier season rains are particularly as far ahead as at this time last year, with the grain sown later about a week behind. A considerable amount of the crop was not in unusually late, but with present weather conditions maintaining the rapid and healthy growth there should be no question of harvesting the crop within this fall.

Cutworms have caused damage of a minor character at a few points, but the loss in this respect does not nearly approach the average. Hail has been down the crops over limited areas in a few localities in Saskatchewan and Alberta, but the grain was not sufficiently advanced to be permanently injured. The insects for the most part are in the early stages of their life, and the increased amount of new breaking under, and the farmers are taking every advantage of the satisfactory soil moisture conditions.

Welcome Return of Royalty

Duke and Duchess of York Are Home After Six Months' Tour

London.—The British newspapers were filled with enthusiastic welcome to the Duke and Duchess of York upon their return from their six months' tour to New Zealand and Australia. In connection with the welcome are many references to the self-sacrifice of the Duchess of York in having left her infant daughter, Princess Elizabeth, for so long a period. One writer says that the Duchess is a link of common understanding with all these common British wives and mothers whose husbands are called to visit or make homes in the colonies.

The Duke and Duchess of York are the only British royal couple who have not visited the United States and Canada. The Duke and Duchess are expected to visit the United States and Canada in the autumn of 1926.

Chinese Nationalists Suffer Defeat

30,000 Casualties Reported After Four Days' Fighting

London.—A Shanghai despatch to Exchange Telegraph says the Chinese Nationalists admit suffering the heaviest reverse in the war at Suifu, North Western Kiang province.

Attacked by General Sun Chuan-fong and his Shantungese Nationalists evacuated the city after four days' fighting, in which they lost 20,000 men, mostly killed, and retreated 20 miles to Pongta.

Killed in Air Crash

Flight Lieutenant Anderson in Fatal Accident at High River

Calgary, Alta.—Flight Lieut. P. N. Anderson, Royal Canadian Air Corps, was instantly killed when his plane crashed and burst at the High River Police air patrol station.

The accident occurred as the flier was landing in formation, a test flight for the Jubilee Celebrations being in progress.

The wrecked ship immediately burst into flames. Anderson was 25 years old, unmarried, and his family resides in the Brandon district.

Dr. Haanel Passes

Ottawa.—Dr. Eugene Haanel, 29 years superintendent and director of mines, died here recently, aged 86 years. He was internationally famous and held a number of degrees from Canadian and American universities.

Captain Roald Amundsen, famous Norwegian explorer, who has now sailed to the North Pole or vicinity, is taking a trip to Japan and

Retains Premiership

H. H. BROWN, Premier of Manitoba, whose Government is expected to be re-elected.

TWO CLASSES FOR CRUISERS URGED NOW BY BRITAIN

Geneva, Switzerland.—Great Britain proposed to the technical committee of the disarmament conference that the cruisers be divided into two classes, one of 10,000 tons carrying eight inch guns and the other of 7,500 tons with six inch guns.

The United States and Japan have expressed their opposition to the proposal. The British have requested that the committee be asked to examine the proposal in the light of the fact that the United States has a fleet of 10,000 tons carrying eight inch guns.

Some observers have expressed fears that the tripartite naval conference has reached a critical stage because the British and United States representatives have been unable to come together on the question of reducing the Washington treaty.

The Japanese have announced their intention to support the British view on the question of limitation of the size and armament of battleships, consideration of which would mean discussion of problems thought to have been solved by the Washington treaty of 1922.

The determination of the United States delegates to restrict the conference to the scope outlined by President Coolidge's declaration to the press remains unchanged.

Makes Parachute Descent

Toronto Girl Drops From Aeroplane At One Thousand Feet

Hamilton, Ont.—Miss Caroline Sykes, a Toronto office clerk, made what is known to be the first parachute descent from an aeroplane by a woman in Canada here when she stepped off an aeroplane 1,000 feet up in the air and made a perfect landing on the top of a mountain. Miss Sykes had been up in an aeroplane but one before. It is likely she will be employed to repeat the stunt daily at the Canadian National Exhibition in Toronto.

Seed Company Changes Hands

Regina, S. R. Robinson, western manager for the Steele-Birge Seed Company, Limited, has announced the purchase by the Steele-Birge Company of the Canadian interests of the H. M. Perry Company, Windsor, Ont. The purchase gives the Steele-Birge Company a total selling list of 35,000 acres, while the H. M. Perry Company will concentrate its efforts in the United States.

Robbers Destroy Note Paintings London.—Scotland Yard detectives are investigating the \$25,000 robbery of the house of Colonel Harry Day, M.P., in which the thieves slashed four valuable paintings, one the city of London, the hand of King in 1605 inscribed "To Harry Day from his sincere pal, Harry Houdini." Colonel Day said he could not imagine a motive for the vandalism.

Famous Explorer for Japan

UNITS OF EMPIRE AS ONE IN TIME OF COMMON PERIL

Chicago.—The British family of nations may bicker among themselves but they will meet on common ground with a united front, Sir Cecil Lloyd, legal adviser to the British foreign office, said at a University of Chicago audience, during the second of a series of lectures on "Problems of the British Empire."

In this lie the claims of empire to be a solid unit and international though foreign powers might question the reasonableness of treating the empire as a unit in strength of the common allegiance to one king, Sir Cecil said.

Families cannot be made by contract; they cannot be made or unmade by mere agreement of their members. The British empire has grown up together and as such a unit, they may have become more self-contained more able to stand alone, but the idea which united them in the past still remains intact.

British nations, Sir Cecil declared, will continue to act together in the future. The spirit of the British nation is based on the conviction that questions affecting the whole group cannot be left to one member of the group to conduct with out reference to others.

Equality of status among nations, as among individuals, did not mean equality of status, but equality of treatment. In the British Empire equality meant the absence of any power controlled by one community over another. Some inequalities still exist between the powers of the British and Dominion governments but these were being swept away.

Newspaper Men Elect Officers

Mr. Sam Wynn, Yorkton, New President of Weekly Newspaper Convention

Timothy, Ont.—Sam Wynn, Yorkton, Sask., was elected president of the Canadian Weekly Newspaper Association at the concluding session of the annual meeting here. Other officers are: First vice-president, S. H. Anchor, Campbellton, N.B.; second vice-president, Hugh Savage, Dunsmuir, B.C.; third vice-president, H. E. White, Kamloops, B.C.; secretary, H. E. White, Kamloops, B.C.; treasurer, H. E. White, Kamloops, B.C.; and H. E. White, Kamloops, B.C.

Novel Flight Planned London.—Major Moore announced that an invitation would be broadcast immediately to aviationists to qualify for a non-stop flight from London, Ont. to London, England, for a prize of \$25,000 to be provided by a local brewery. A machine for the flight will be purchased by the same concern and handed over to the aviator as soon as the necessary arrangements are completed.

Favor Amalgamation Vancouver, B.C.—Ratepayers of Vancouver and South Vancouver are overhauling municipal ward boundaries in a bid to secure the favor of amalgamation of the city and the municipalities of South Vancouver and Point Grey.

Receives Peace Prize

Oslo, Norway.—Foreign Minister Stresemann of Germany has arrived here to receive the Nobel peace prize for 1925 which he shares with Foreign Minister Brand of France.

Transfer of Military Units

Several Western Units Will Change Location

Ottawa.—Re-location of a number of military units throughout Canada is announced by the department of National Defence.

The Westminster Regiment, "C" Company, has been transferred from Alton to New Westminster, B.C.

The Ashtabula Regiment, "C" Company, has been transferred from Manx to Indian Head, Sask.

Canadian Machine Gun Corps, No. 3 Company, machine gun battalion, has been transferred from Nanaimo, B.C. to Milton, Ont.

Robbers Destroy Note Paintings

London.—Scotland Yard detectives are investigating the \$25,000 robbery of the house of Colonel Harry Day, M.P., in which the thieves slashed four valuable paintings, one the city of London, the hand of King in 1605 inscribed "To Harry Day from his sincere pal, Harry Houdini." Colonel Day said he could not imagine a motive for the vandalism.

Bill Given Second Reading

Latter-day second reading was given in the house of lords to the Warlike Men's Compensation ("Transfer of Funds") bill, under which compensation is awarded to beneficiaries in one part of the Empire may be transferred to the country in which they reside. The bill arose from a resolution passed by the imperial conference last year.

Best Opening For Aviation In Canada

Vast Distances Mean Time Saving a Distinct Need

Calgary.—This year's two successful trans-Montana flights have given a tremendous impetus to the development of air transportation, and commercial flying will see wide-spread extension both in the United States and Canada during the next few years in the opinion of H. F. Macomber, head of the Ryan Airlines line, Chicago, holders of the "Spirit of St. Louis," the monoplane in which Colonel Charles A. Lindbergh made his epoch-making flight from New York to Paris.

"Advances made in the science of flying during the past few years need only be brought to public attention," he said, and went on to state that "transportation by air when properly conducted is at least as safe as any other means of transportation."

He attributed the slow adoption of the flying line to the vast amount of publicity given accidents in it and the resulting conservatism. "An aeroplane passenger may be scratched in some accident and because of that appears in his headlines, while a railway accident in which 20 are killed is not given half the attention," he said.

"What is the greatest problem waiting to be solved by flying now?" he was asked.

"I would say that unquestionably it is the establishment of airports, air stations, equipment for flight, flying and the provision of emergency landing fields," he replied. "This is up to the various towns and cities and the governments of the provinces of Canada, the United States and Federal Governments."

Mr. Macomber said, "has the biggest openings for aviation in any country in the world. It is a country where the factors of time saving and safety are so great that it is only a matter of time before flying can fill a distinct national need."

Canadians All

Mr. Carter Says Canadian is a Title to Be Proud Of

Toronto, Ont.—After 38 years, Miss Catherine Carter, daughter of one of the Fathers of Confederation, Sir Georges Edouard Carter, returned to Toronto, Ontario, where her childhood home was built in 1851 and 1852. When the Government moved to Quebec at that time she went with her father, and today his never seen home.

Madame Carter came from France as the guest of the Canadian Government to attend the celebration of the diamond jubilee of Confederation.

"One thing I do hope to see soon is the adjective 'French' dropped in French-Canadian," she said. "I think everyone should be just plain Canadian."

"I am going through the West and I am going to get a native crew. My father had a wonderful head dress and he told me to get the Indians."

Bans Milk From Montreal

Health Commissioner of New York

Saratoga Springs.—Health officers throughout New York state have been directed by Dr. Matthias Reed, Jr., state commissioner of health, to exclude from their districts all importation of milk and milk products originating in Montreal or in the vicinity of the Canadian metropolis.

In his warning, issued at the opening session of the annual state convention of public health officers here, Dr. Reed said that Montreal was in the grip of the greatest typhoid epidemic of modern times.

In a population of 250,000 there have been over 3,000 cases of the disease, with a death rate of eleven for each one hundred cases, or nearly 300 deaths. The disease has been an epidemic since January, he said. It was milk borne epidemic and could apparently come in a pestilential point in the city.

Ship Legislation Cancelled

Panama.—Panama Consul Morris at Vancouver, B.C., has been ordered to cancel the Panama registry of the Pacific liner which some time ago was seized by the American prohibition authorities and later released on the order of a Federal court.

Panama action was based on the non-payment of \$112 due to the National treasury for taxes. Mr. Morris reported that cancellation of the Panama registry had been met by the owners of the vessel.

Increase in Coal Output

Vancouver.—During the first four months of the year the coal output of British Columbia produced 544,250 tons, an increase of 10 per cent over the same period of 1925.

Increased Acreage in B.C.

Vancouver.—B.C.—Agricultural production in this part of the province is attracting a good deal of attention. It is now reported that 70 acres of canola have been set out this season.

GOVT. VICTORY IS NOW ASSURED IN MANITOBA

Winnipeg.—Premier John Bracken and his Progressive supporters were returned to power in the provincial general election with a clear majority to guide the political destinies of Manitoba for another five years.

Indications are for a Government victory in 20 of the 35 seats in the Legislature, or equal to its representation at dissolution.

The striking feature of the election, however, was the showing of the Conservative Party, which in standing orders recently compiled, was credited with 15 seats, a gain of nine. Liberals appeared to have lost two seats, with only three candidates declared objects of vote, while the other 12 were believed to have been won by the Liberals in their pre-dissolution representation.

The gains were chiefly from the Conservatives in independent groups, which had only elected one member and was leading in 1920. In the last 1920 the Independents had a vote of 15 seats.

The election of Manitoba appears to have registered a sweeping defeat in favor of conservatism, the Conservatives for the sale of beer. Winnipeg voted a majority of approximately 15,000 for change in the beer laws, and sale of beer by the state in Government-owned establishments likely will be the result. Proponents of the latter system are expected to be in force by the latter end of the year.

Proponents of the latter system are expected to be in force by the latter end of the year.

Dusting Wheat Fields

Will Use Aeroplanes to Control Dust by Spreading Chemicals

Puerto, N.S.—Aeroplanes for dusting wheat fields with "rocks," a chemical dust, will be used in the future, it is made in the hope that it will prevent or control black stem rust on wheat. The experiment is on an extensive scale in Manitoba and will be tried in a smaller way in Cass County, North Dakota. It was learned here.

C. M. Sheldrick, officer of the Royal Canadian Flying Corps, spent Sunday on a tour from Philadelphia to the West, where he will be in charge of the dusting operation in Manitoba. It is planned to treat about 10 to 15-acre tracts of each.

Walter R. Reed, who is to make some observations on his farm near Chatham, N.B., connected with Mr. Sheldrick regarding the proposed Canadian experiment, Mr. Reed will have experiments made on three farms in the province, on an extensive scale about 10 to 15-acre tracts of each.

Bans Milk From Montreal

Health Commissioner of New York

Saratoga Springs.—Health officers throughout New York state have been directed by Dr. Matthias Reed, Jr., state commissioner of health, to exclude from their districts all importation of milk and milk products originating in Montreal or in the vicinity of the Canadian metropolis.

In his warning, issued at the opening session of the annual state convention of public health officers here, Dr. Reed said that Montreal was in the grip of the greatest typhoid epidemic of modern times.

Local and General

Campbell's hall is being re-
painted and redecorated this
week.

L. W. Boden's son and daugh-
ter, from Victoria, B. C., are
here on a visit to their father.

The death occurred shortly
afternoon on Thursday of Mrs.
Matt. Sheldon, after a long
illness.

Mrs. J. F. Harper, of Calgary,
spent the week-end on a visit
to relatives in the vicinity of
Champion.

Mrs. W. C. Hoskins and three
children left on Tuesday for
Sylvan Lake, where a month
will be spent.

Miss Ella Stephenson and
Miss Kathleen Watkins are
spending their holidays at their
respective homes.

M. G. Clever, who has been
in Champion for some time,
left for his home in Calgary
on Sunday morning.

H. Cooper leaves on a two
weeks holiday next week,
which will take the form of a
motor trip to the coast.

Mr. and Mrs. J. N. Beaubier
left on a visit to Michigan on
Monday, where they will spend
some weeks with relatives.

A hail storm on Sunday
afternoon east of Snake Valley
is reported to have done con-
siderable damage south east of
Travers.

Mrs. Guy Dow spent the first
of July at home, leaving Bar-
bara at Calgary, well on the
way to recovery from her very
serious illness.

Mrs. Theriault leaves here
on Monday, July 18th, and will
return about August 15th. Miss
Coe will have charge of the
store during her absence.

Bert Gill's new residence in
the east end is nearing com-
pletion, the contractor making
record time in its construction
despite the wet weather pre-
vailing.

Champion Celebrates

(Continued from front page.)

Girls Race—Lucinda, Lloyd, Ada
Williamson, M. Hopkins.
Boys Race—H. Hofford, W. Booth,
B. Leback.

Girls Race—M. Hopkins, Lucinda
Lloyd.
Ladies Race—Mrs. Hammill, Mrs.
Clever.

Mens Race—John Miller, W. Adams
C. Crane.
During the day the Champion
band added largely to the en-
joyment of the visitors. Barney
has a band which will go far in
his hands. The panorama was
also an enlivening addition to
the day.

Recitation Judges' Report

The following is the judges
report of the patriotic recitation
contest held as part of the
Diamond Jubilee programme
at Champion on July 1st.
Grade VI—1st Theodor Holm, 2nd
Edith Fleming.
Grade V—1st Ellen Collins, 2nd
Wilbur Matlock, 3rd Helen Lawrence
and Helen Hoskins.

Owing to the small number
of entries and confusion and
uncertainty of the day's pro-
gramme the judges were forced
to change the grouping of the
entries and judge according to
grades rather than groups.
However, we feel that they
have been very fair and con-
scientious and hope everyone
will be satisfied. The judges
were Mrs. H. Johnson, Mrs. E.
Freeze and Rev. S. R. Hunt.

A formal presentation of the
prizes will take place on Friday
night, July 8th, sometime
during the picture show in
Campbell's hall, Champion. The
other officers join with me in
wishing all the boys and girls
happy holidays.
(Signed) Bertha Ryan, Pres.
P.T.A.

The Sunday services in connection
with the Diamond Jubilee celebra-
tions were held in McCullough's hall at 2:30
in the afternoon, with Rev. S. R.

MAIL CONTRACT

SEALED TENDERS addressed to the Post-
master General, will be received at Ottawa
until noon on Friday, July 9th, 1927, for
the conveyance of His Majesty's Mail, on a
proposed contract for a period not exceeding
four years (vice per week on the
proposed Champion Rural Route No. 1
from the Postmaster General's pleasure.
Tenders, unless containing further infor-
mation as to conditions of proposed Contract
may be seen and blank forms of Tender may
be obtained at the Post Office at Champion,
or at the office of the District Superintendent
of Postal Service, Calgary, Alberta.
R. COLEBY,
District Superintendent of Postal Service,
DEPUTY SUPERINTENDENT'S OFFICE,
CALGARY, Alberta, July 6, 1927.

Hunt in charge. The program sug-
gested by the central committee
was followed, and the large audience
found it decidedly impressive. Special
music was furnished by a male
choir. Mrs. McLeod of Brant and
G. M. Campbell sang a splendid
duet. Moses, Moffatt, Hummel
and Caldwell furnished the band music.
Miss Ella Stephenson presided at the
piano. A feature of the service was
the presentation to Mrs. Linton of a
flag and bouquet, that lady being a
descendant of one of the fathers of
confederation.

A sample of rye brought from
T. R. Jopling's farm measured
6 feet, 5 inches in length. The
entire field will average very
closely to 6 feet in height. Mr.
Jopling also has brome grass
approaching six feet in height.

Behind the black shadows
of the law late broods
lure—greed lights greed
praying vultures prey on vultures—
yet behind the cynical
mask of hardened crime lurks
love and a little child—See
"Outside the Law."
